Fire Resisting Safes

In this age of computers and electronics, it wouldn't seem far from the truth to say that we have perfected the paperless office. However, that isn't the case.

Most offices still ride on the back of their several documents and papers, without which they wouldn't be able to function properly. And when this paper data is threatened by means beyond one's control – fire, theft, etc. – the office grinds to a halt. Don't let your office come to a standstill. Invest in a Fire Resisting Safe – the ideal protection for all office documents. The way to your peace of mind.

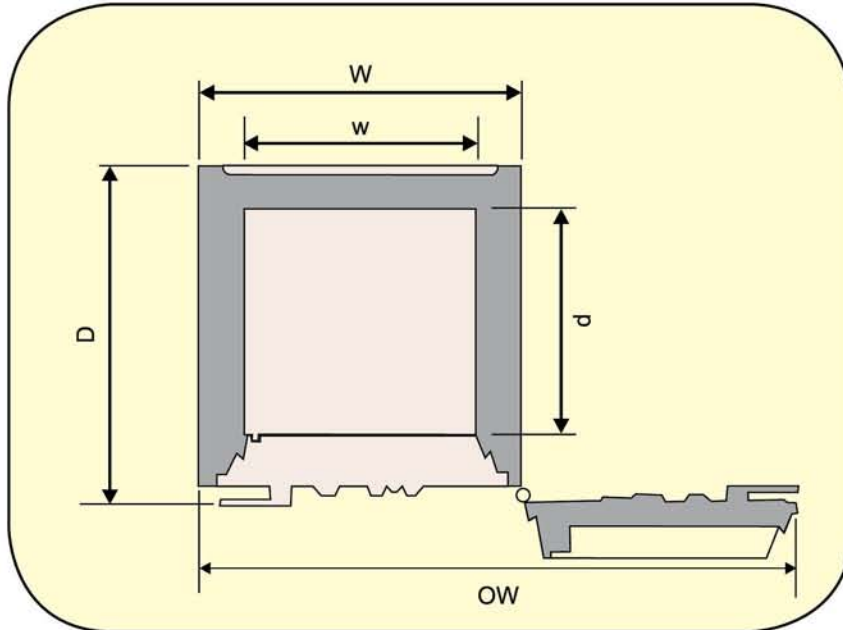

Features

- ▶ Designed to withstand fire and impact as per the stringent UL test standards.
- ▶ Special tongue and groove construction to prevent hot gases and smoke from seeping in.
- ▶ Burglar / Theft protection provided with two locks.
- ▶ Option for two key locks OR one numerical combination lock and one key lock OR one electronic combination lock.
- ▶ One lockable drawer and one adjustable shelf (FR Safe 1060 has two adjustable shelves) to maximise interior storage space.
- ▶ The model FR – 445 and above are provided with castors.
- ▶ Safes are Powder Coated in Textured / Hammer Tone Finish.
- ▶ Colour Options available.
- ▶ Flexibility of Horizontal / Vertical models in FR Safes 20 ltr and 30 ltr.

- ▶ Safes beyond 1 hour rating can be supplied on special request at an additional cost.

Performance Standards

- ▶ Tested for Fire Endurance, Fire & Impact and Explosion Hazard Test by Underwriters' Laboratory, USA (UL 72 - Class 350 - 1 Hour)
- ▶ FR Safe 20 litres to FR Safe 40 litres have successfully been tested and listed by SP Laboratories, Sweden for 90 minutes of Fire Endurance as per NT - 017, 90 P standards.
