**Record
Room
Door**

Reinforced Security.

The need

Records are the vital bases on which any business, large or small, survives. These irreplaceable records are normally generated in large volumes and need to be stored safely and securely.

Here comes the concept of Fire Resisting Record Room Door. For making the room actually secure, the room must be provided with a door, which is not only fire resistant but also burglar resistant

To overcome this problem Godrej gives from its 100 years of experience, the Godrej Record Room Doors, which not only gives protection against fire but also provides security against burglary

The construction

The door slab:

A fully welded multi corner bend construction without a single rivet makes the body integral whole Godrej Record Room Doors are armored with a specially formulated Double Duty Barrier, in addition to this it is reinforced with special hammer and drill resistant alloy plates. This dual protection gives the door immense protection from attacks of sledgehammers power-drills and chisels

Doorframe:

The doorframe is one piece; rivetless, fully welded frame construction, which is sturdier and more rigid under most trying conditions. Also it is more attractive in appearance beside easy to clean

The doorframe is formed in to a 'Box-Jamb', which provides a rebate for the bolts that provides enhanced protection against attacks of dislodgement including hydraulic jack attack

Locking Mechanism:

Two, superior quality 8-levers, dual control, high precision, locks made of Brass body as well as brass levers actuated by phosphor bronze springs.

Highly sensitive relocking device provided to the bottom lock prevents burglary by instantly deadlocking the door, if the locks are tampered with either mechanically or by using liquid explosives

The door can be fitted with a 3-wheel combination lock which gives nearly one million combination for setting and resetting

Time Locks can be fitted if mentioned at the time of placing the order

Specifications

Suitable for wall thickness (mm)	230 - 305
Overall size (front frame) H x W (mm)	2065 x 1020
Overall size (rear frame) h x w (mm)	1985 x 940
Clear Opening (mm)	1880 x 775
Thickness of door with lock case (mm)	128
Thickness of door slab (mm)	10
Thickness of lock & vital part (mm)	62
Net weight with grill gate	530 kg
